

Cantor College: Staff Handbook

1. Introduction

Welcome to Cantor College. This handbook serves as a primary resource for all staff regarding employment standards, campus procedures, and professional expectations. All staff members are entitled to register as members of the Library and Resource Centre for purposes of College employment.

2. Professional Conduct

All staff members are expected to maintain a high standard of professional behavior. This includes:

- Maintaining a supportive and inclusive environment for all students and colleagues.
- Adhering to the College's regulations for students and staff procedures as set out in this handbook.
- Ensuring all digital communications and account security follow the College's required password standards (minimum 8 characters, including numbers and uppercase letters).

3. Health and Safety

The safety of our staff and students is paramount. Staff must:

- Familiarize themselves with fire exit locations and designated first aid officers.
- Not use personal electrical supplies to power their own equipment unless the equipment has been tested and confirmed as meeting required Health & Safety standards.
- Take reasonable precautions against the theft of personal belongings and not leave items unattended.

4. Library and Resource Centre Rules

Use of facilities implies acceptance of the following rules:

- **Access:** ID cards issued by the College are not transferable. The person named on the card is responsible for all items borrowed.
- **Conduct:** All users are required to conduct themselves quietly; conversation must be kept to a minimum and is prohibited in "Silent" areas.

- **Electronics:** Mobile phones must be turned off in all study areas. Personal stereos may not be used.
- **Food:** Eating and drinking are not permitted in any public areas of the Library.

5. Administrative Procedures

- **Enrollment:** For student enrollment inquiries, staff should direct individuals to the "Find Us" and "Contact Us" pages.
- **Data Integrity:** All staff registration data is stored securely. The system automatically tracks account creation via a `created_at` timestamp to ensure accurate record-keeping.
